CIRCULAR

Subject: Update on Certification for BIOSUISSE & NATURLAND Standards

Ref. No.: ADITI/HO/2024/CIRCULAR/009

Dear Valued Clients,

Warm greetings from Aditi Organic Certifications Pvt. Ltd.

We wish to inform you of important updates from International Certification Bio Suisse AG (ICB AG) and NATURLAND, Germany regarding the certification of operations under Bio Suisse and NATURLAND standards.

Simultaneous Inspections:

- The same inspector who conducts the NPOP inspection will also handle Bio Suisse inspections.
- Both inspections must be carried out simultaneously.
- Aditi will combine the Naturland inspections along with the NPOP and Bio Suisse inspections for logistic as well as operational efficiency.

Residue Detection Reporting:

- Residue test reports must be reported to ICB AG within 5 working days and to NATURLAND within 3 weeks upon receipt of the test report if:
 - Testing was required for a Certificate of Inspection (COI).
 - Sample was collected by the inspector during the inspection.
 - Sample was collected as part of an Organic Farming Information System (OFIS) investigation.
- Any residue contamination ≥ 0.01 mg/kg in products, and > 0.1 mg/kg in leaf samples, must be reported.
- Details including the substance, product, residue amount, and operation must be sent to ICB AG and NATURLAND.
- Immediate correction measures as per EU organic certification or equivalent rules must be implemented to address contamination.

Thank you for your prompt attention to these updates. For any additional information or clarification, please contact us.

Kind regards,

For ADITI ORGANIC CERTIFICATIONS PVT. LTD.
